

Brainstorming & Idea Prioritization Template

Date	29-06-2026
Team ID	XXXXXX
Project Name	OptiCrop
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Sampatharao Mahesh Kumar	Proposed an AI-powered crop recommendation system using soil and environmental data. Also suggested weather integration and future mobile application support.	Core Feature	G 1
2	Chikkam Renuka	Contributed ideas for a simple farmer-friendly interface and soil health monitoring dashboard. Also recommended multilingual support to improve accessibility.	User Experience	G 1
3	Sasank Kumari Chintada	Suggested implementing a	Machine Learning	G 1

		Random Forest-based crop recommendation model and conducting detailed Exploratory Data Analysis (EDA). Also proposed a crop yield prediction feature for better farm planning.		
4	Sreeja Mutha	Proposed developing a robust data preprocessing pipeline and feature engineering techniques to improve model performance. Also suggested using K-Means clustering for soil pattern analysis.	Data Processing	G 1
5	Dasari Renuka Bhargavi	Suggested creating responsive web pages and implementing a Flask backend for prediction services. Also recommended cloud deployment to make the application accessible online.	Backend Development	G 1
6				

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	AI-Powered Crop Recommendation System using Machine Learning	High	High	1	Yes
2	Soil Health Monitoring Dashboard with Analytics	Medium	High	2	No
3	Mobile Application with Weather Integration and Multi-Language Support	Medium	Medium	3	No
