

Project Demo Planning

Date	02 July 2026
Team ID	XXXXXX
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demonstration plan was prepared to ensure that all major aspects of the OptiCrop project are presented effectively. The demo focuses on explaining the problem statement, showcasing the machine learning workflow, demonstrating the web application, and highlighting the project's impact on agricultural decision-making.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, objectives, and challenges faced by farmers in crop selection.	2	Sampatharao Mahesh Kumar
2	Dataset & Data Analysis	Explain the Smart Agriculture dataset, preprocessing steps, and EDA visualizations.	3	Sasank Kumari Chintada
3	Machine Learning Model	Present model training, algorithm comparison, and performance results.	3	Sreeja Mutha
4	Web Application Demonstration	Demonstrate user interface, input forms, crop prediction process, and results page.	4	Dasari Renuka Bhargavi
5	AI Assistant & Additional Features	Showcase AI Assistant, confidence scores, and alternative crop recommendations.	2	Chikkam Renuka
6	Conclusion & Future Enhancements	Summarize project outcomes, benefits, and future scope.	1	Sampatharao Mahesh Kumar

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for intelligent crop recommendation systems.
2	Solution Overview	Present OptiCrop architecture, workflow, and key technologies used.
3	Live Feature Demonstration	Demonstrate crop prediction, confidence scores, and AI Assistant functionality.
4	Q&A Session	Address evaluator questions and discuss future enhancements.
