

Project Executable Files

Date	01 July 2026
Team ID	xxxxxx
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Project Executable Files

This section contains all executable, deployable, and supporting files required to run the OptiCrop application. The files are organized according to their functionality, including data preprocessing, model training, model evaluation, application execution, and deployment. Proper organization and documentation ensure that evaluators can easily set up, execute, and validate the project. All source code, configuration files, trained machine learning models, datasets, and supporting resources are included to enable successful execution of the OptiCrop system.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes

5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA

8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

[Paste or describe your folder structure here. Example:]

```

/project-root
/src    - Source code files
/tests  - Test files
/docs   - Documentation
/config - Configuration files
README.md - Setup and run instructions
requirements.txt - Python dependencies (or package.json for Node)
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	

Demo Video Link	
------------------------	--

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites: [List required software, versions, and system requirements] Step 1: [e.g., Clone the repository: git clone <url>] Step 2: [e.g., Install dependencies: pip install -r requirements.txt] Step 3: [e.g., Configure environment: copy .env.example to .env] Step 4: [e.g., Run database migrations: python manage.py migrate] Step 5: [e.g., Start the application: python manage.py runserver] Step 6: [e.g., Open browser at http://localhost:8000]

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
